

End-to-end Loomis ATM Services

Efficiency, accuracy & security

Loomis can work with you to ensure your ATMs are stocked and ready to face the challenges ahead.

Whether you're a Bank or an Independent ATM Deployer (IAD), Loomis understands your need to provide customers with an efficient, round the clock ATM service. We are here to support you to get the results you need and deliver a service that you and your customers will appreciate.

You may have very stringent time constraints for when your ATMs can be filled or serviced so Loomis will work with you to develop the best possible service.

It's just one way we work in partnership with you to offer the ATM service you need —delivered in the way that suits you best.

Good value, safe, efficient and built on strong open relationships with great communication — our comprehensive ATM Service is rapidly becoming first choice for Banks and IADs alike.

From replenishment to maintenance, Loomis offer complete ATM solutions for your business

Loomis offer a completely bespoke ATM solution and clients can select elements from our total offering, including cash forecasting, help-desk support and replenishment.

An option-based à la carte solution means our customers have maximum flexibility.

What our customers say:

“As we are approaching the end of this week of appalling weather, I thought it appropriate to express our appreciation for the difficulties that your teams must have clearly been experiencing during these conditions of ice and deep snow.

Please pass on our thanks to them for the service that they have provided to our customers and ATM users in such challenging circumstances.”

ATM Services in detail

If you have a network of ATMs, you can cut running costs and increase efficiency with Loomis' specialised ATM service.

You don't have to choose our whole ATM offering — you can select any of our services, combine them or add them to your existing arrangements to keep your ATMs running efficiently and trouble-free.

Cash replenishment

We can manage the replenish of ATM cash by basing it on the planned balance of each ATM.

We can also respond to ATM centre or monitoring system requests for replenishment.

Cash cycle management and load forecasting

It is possible to reduce your replenishment costs with our cash cycle management and load forecasting service — reducing the number of replenishments while maintaining optimal cash availability. We can also provide cassette management — keeping down the cost of use.

ATM Maintenance

Through selected partners we can provide a maintenance service for your ATM estate. From cleaning machines and replenishing stocks of receipts, right through to handling software updates and replacing parts.

Bulk till management

Because we hold bulk cash within our cash centres on behalf of UK banks, we can manage your bulk till — reducing cash movement by recycling returned notes and making our cash replenishment more efficient.

Hardware installation

We can work with you or your selected hardware installer as you roll out new ATM hardware and manage the Initial Cash Load (ICL).

Parts supply and management

We can supply ATM parts for all makes of machine, and our engineers carry common parts with them.

Maximum availability, optimum loading and faultless forecasting are just part of Loomis ATM Solutions

Intelligent lock installation and management

If you want fully audited access control, we can work with selected partners to replace existing ATM locks with intelligent locks.

Operated by one-time access codes they allow replenishment and maintenance staff to enter the ATM safely and with full central control.

Depository collection, processing and banking

If you need funds transferred from a drop safe we can deliver it to your chosen bank or process it and credit it to your bank account.

Contact us on 0845 309 6419 to find out more about the full range of ATM solutions that Loomis can offer your business.

Managing **cash** in society.

Working for major financial institutions, independent ATM deployers, major retailers, public sector bodies and a huge range of businesses, Loomis provide cash management solutions and services to organisations that handle cash.

Whether you need to transport cash securely, eliminate opportunities for fraud or analyse and understand your cash flow in detail - we have a solution to meet your needs.
