

Counted, processed and banked with **Loomis Cash Processing**

Counting and banking your money - **fast**

Once you've accepted cash from your customers, you need a fast, efficient way of counting, reconciling and depositing it in your bank account.

That is where Loomis Cash Processing comes in.

When you ask us to take care of your cash processing, you benefit from a network of specialist cash processing centres across the UK — where your money is counted by our staff, who are vetted in accordance with security industry standards.

Our service can handle cash from single or multiple sites, large or small, public or private sector — giving you complete peace of mind that your cash will be accurately deposited in your bank in next to no time.

Loomis' cash counting and validation services are relied on by enterprises and organisations in every sector.

Once your money reaches our cash centre it is processed efficiently, to expedite the credit of funds to your bank account.

Once collected your cash is transported to one of our specialist national cash processing centres

As part of our Cash Processing process we check for forgeries and advise you if any are detected.

With Loomis Cash Processing you also get access to reports which give details of processed cash from all of your premises, while our tracking systems give you total security every step of the way.

Flexible and responsive to your needs, our service allows us to provide consolidated cash to your bank either directly or via a bulk till. If you need multiple credits from one deposit, that's no problem either.

A comprehensive and detailed set of reports are provided to all Loomis Cash Processing customers.

Validating and counting non-cash items

Unlike cash processing services provided by bank branches, we can also count and reconcile non-cash items such as cheques, gift vouchers and travel tokens — processing them in a day if required.

And if you take volumes of any major foreign currency we can help you count and reconcile that too.

Loomis cash processing services also gives you:

- Delivery to any central or local bank
- Any volumes of cash processed
- Your money reaches your bank account faster.

Loomis FX

If your business accepts foreign currency then you can have it collected from your premises, processed, and paid into your bank account in GBP so you can utilise it as quickly as possible.

Loomis FX provides a one-stop solution for all your foreign currency cash management needs.

SafePoint

The widest ever range of smart safe solutions makes cash management faster, safer and smarter. Because users no longer need to count, sort or bank their takings, they save time they can better spend on production, customer relations, developing their business, and boosting their bottom line.

Every SafePoint solution is designed and installed to benefit a business's specific needs, including a connected safe, collection and delivery, funds insurance, maintenance and more. Recycling systems with selected solutions enable merchants to reuse deposited funds for cash floats and other uses, streamlining the process still further.

With embedded artificial intelligence, software and dedicated services, SafePoint brings cash into the digital age. Everything is designed to facilitate cash management, access forecast data and monitor all operations.

SafePoint brings all Loomis's know-how and expertise, plus unique technologies and powerful, reliable equipment provided through strong partnerships with leaders in the cash management industry to ensure your peace of mind.

Managing **cash** in society.

Working for major financial institutions, independent ATM deployers, major retailers, public sector bodies and a huge range of businesses, Loomis provide cash management solutions and services to organisations that handle cash.

Whether you need to transport cash securely, eliminate opportunities for fraud or analyse and understand your cash flow in detail - we have a solution to meet your needs.
